RELATED EXPERIENCE

React Portfolio Website
https://damanhoury.dev/

- Designed website to incorporate a mobile first responsive design using different displays for a consistent user experience and React routers to maintain proper component structures
- Created a random color picker that gives the user the option to pick and copy from rgb colors.
- Implemented Npm packages and React libraries to build up a unique website view

Game Programming
Unity 2D/3D Programming

- Used C# and Unity to design an auto runner game with tokens, obstacles and a final objective
- Maintained proper version control of the game using Git
- Implemented character and obstacle designs using sprites for visual effects

Movie Clone
WebSite | React
- Executed API calls and displayed contents on screen in a clean organized way
- Attached a search bar to sort and navigate through API data and reorganize the information on screen
- Incorporated animations to amplify user's retention and page's view layout
